TWF International Ltd have been designing, manufacturing and distributing wetsuits from Cornwall since 1969. With our wealth of knowledge, we have developed a high-quality range of wetsuits, bodyboards, footwear and accessories that suit many markets and price points.

MATERIALS

MESH CHEST PANEL
Durable textured skin finish on the surface of the neoprene for reduced wind chill.

SUPERSTRETCH FABRIC
4-way superstretch material in the shoulder areas allows freedom of movement during action watersports like surfing, kayaking, sailing.

DURATEX KNEES
Durable textured double knit nylon which stretches as you move and protects the knees from knocks and scuffs against hard surfaces.

CONSTRUCTION

FLATLOCKED SEAMS
Flatlock is a strong, comfortable, flat stitch. Formed by overlapping the neoprene and stitching the two pieces together.

3/2MM ULTRALIGHT FOAM
TWF uses a combination of multiple thickness Ultralight neoprene for increased flexibility and warmth in crucial areas.

BACKZIP
Back entry system. YKK zip.

SIZE CHART

Wetsuits should feel snug on and you will probably feel that range of motion is slightly reduced, this is normal. However, make sure breathing doesn't feel restricted. Wetsuit fit should not be too loose. This would let water flow freely through the suit and would therefore lose all the benefits of the trapped water being warmed by your body. For a correct wetsuit fit, wrists, ankles and neck should be snug. The fit should not be too baggy in the underarm or leg area. Some bagginess at the small of the back is normal.
